ALPR SYSTEMS

ELSAG® ENTERPRISE OPERATIONS CENTER

OPTIMIZE YOUR PLATE READER DATA WITH THE ELSAG ENTERPRISE OPERATIONS CENTER

Leonardo's automatic license plate recognition (ALPR) data management tool, the ELSAG Enterprise Operations Center (ELSAG EOC), manages all ELSAG Plate Hunter ALPR intelligence assets. The ELSAG EOC distributes law enforcement databases to ALPR systems in the field, including periodic updates of hotlists and whitelists crucial to the real-time enforcement of vehicle-related crime.

As ELSAG mobile and stationary license plate cameras read plates, the data captured includes vehicle make, type and color, GPS coordinates of the read (or camera identifier for fixed systems), and date and time stamps. All of the ALPR data from each camera in the field is seamlessly uploaded to the ELSAG EOC server and archived for future queries and analysis to aid investigations. In-depth query filters for plate numbers, vehicle type and color, locations, date ranges and more, return results that can help you identify vehicles of interest quickly. All data stored in the ELSAG EOC can be accessed remotely at any time by authorized users, via a website.

The ELSAG EOC offers strict data security. It allows agencies to assign different levels of data access and provides transparent audit trails of all user activity. The ELSAG EOC also supports agency protocols for data storage.

LEONARDO

Features of the ELSAG Enterprise Operations Center

- Permissions at domain, group and user levels

- Seamless hotlist and whitelist uploads

- Hotlist manager limits visibility of specific hotlists

- Lightning fast query performance

- Query filtering by specific date and time

- Cross-search with option to export results

- Mapping with cross-street locations

- Detailed reporting

- Audit trail for visibility of data sets and use of system

- Easy process for adding cameras

- Includes a smart phone app that allows users to view and query LPR data, add a plate number to a hotlist, and access the Dispatcher and Notifications features of the ELSAG LPR system

EXTERNAL HOTLIST

Local State And Federal Databases Of Suspect License Plates

Constant Data Updates

FIXED & MOBILE SYSTEMS
