 **LEONARDO**

Semi-covert and patented  
Covert ALPR Trailer Solutions

[LeonardoCompany-US.com/lpr](http://LeonardoCompany-US.com/lpr)

## LEONARDO OFFERS THE ONLY COVERT ALPR RADAR TRAILERS ON THE MARKET

A collaboration between All Traffic Solutions and Leonardo, ELSAG® Radar and Variable Message Board trailers offer dependable automatic license plate reader (ALPR) performance while continuing to monitor speed and display information.

Leonardo offers a variety of semi-covert models on which the cameras are partially visible. If fully-hidden cameras are needed, look to Leonardo's patented covert models, the only radar trailers and variable messages boards with concealed ALPR cameras available on the market today.

These flexible, mobile ALPR solutions are delivered to you with cameras on board, making it easy to start or expand your ALPR program.

### UNMATCHED MOBILITY

Trailers feature a simple manual lever lift system for quick 1-person setup. No special equipment is needed to transport them — they can be towed by any size vehicle with a 2" receiver hitch.

### OPTIMAL RUNTIME

All Traffic Solutions' ALPR camera-ready trailers remain up and running for weeks to months straight.\* During late spring and summer, the solar panels can keep the trailer charged continuously with no need to recharge batteries.

### BATTERY & TAMPER ALERTS

Get alerted via text message or email when a trailer is tampered with or when batteries run low. Prevent accidental camera downtime and take the guesswork out of deciding when to recharge batteries. Tamper alerts include photos automatically captured by the trailer so you can take action.

### MULTIPURPOSE & VERSATILE

Trailers are compatible with InstAlert variable message signs and SpeedAlert radar message signs so you can share messages, reduce speeding, or collect traffic data while covertly capturing license plates.

*SpeedAlert 24 radar message sign on 380 ALPR camera-ready trailer with camera enclosure box.*

*SpeedAlert 18 radar message sign on 380 ALPR camera-ready trailer with camera mounting bar.*

 MADE IN THE USA

\*Runtime is dependent upon how trailer settings are programmed and the availability of sunlight for solar power

## RUGGED AND BUILT TO LAST

The continuous weld steel frame and marine-grade powder coat finish withstands heavy rain, snow, ice, and extreme temperatures without rusting.

Most ATS trailers are still in use after 10 or 15 years of year-round use!

## CUSTOMER SUPPORT AND WARRANTY

ATS proudly stand behind our trailers and signs with US-based tech support, complimentary one-on-one product trainings, and the best warranty plans on the market, so you get the most out of your purchase for years to come.

## THREE WAYS TO INTEGRATE ALPR HARDWARE

Each of our ALPR trailers accommodates two cameras, forward or backward-facing.

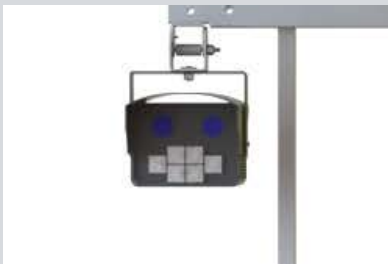

### Covert Camera Enclosure Box for Mobile LPR

- Smokey window conceals the presence of ALPR cameras which capture black and white images
- Patented technology, only available from Leonardo

### Semi-covert Camera Enclosure Box for Mobile LPR

- Clear window protects camera and allows for the capture of color images

### Camera Mounting Bar for Long-range LPR

- Ideal for reading plates from longer distances or across multiple lanes

## MADE IN THE USA

Signs and trailers are engineered and manufactured in the United States in compliance with the Buy America Act and the Buy American Act.

## CUSTOMER SERVICE

For two decades, **Leonardo** and **All Traffic Solutions** have been serving law enforcement agencies around the world with traffic management and public safety missions. ELSAG® ALPR Radar Trailers and Variable Message Boards are backed by the best support and service in the industry, from consultation, to delivery, to training, from our facilities in the US.

Trust the ALPR technologies that agencies everywhere depend on daily.
