

ELSAG Video Plate Hunter

Start or Expand Your LPR Program Affordably

The Video Plate Hunter ([VPH](#)) is a cost-effective solution that turns select low-cost IP cameras into powerful LPR cameras. Using Leonardo's AI-powered optical character recognition (OCR), the VPH analyzes video of passing vehicles to capture license plate data with speed and accuracy.

Whether expanding an existing network or starting fresh, the VPH delivers the tools to succeed within any budget.

Ideal for:

- Surveillance in high-crime districts
- Perimeter security at schools, universities, military bases, utilities, and casinos
- Access control for plants, municipal buildings, and parking areas

How It Works

The VPH software converts video streams from IP cameras into license plate records that include:

- Plate number and photo
- Vehicle make, type, and color
- Date, time, and location

Records are automatically compared to hotlists or whitelists to generate real-time alerts. All data can be managed and analyzed in the ELSAG Enterprise Operations Center (EOC), trusted by major police departments worldwide.

Performance & Flexibility

- Compatible with a variety of IP cameras (Leonardo can test your existing cameras or recommend the right models for your mission).
- Powered by Leonardo's OCR engine, refined for over 25 years to meet law enforcement standards.
- Full turnkey solution with cameras, software, and deployment support.
- Scans hundreds of plates in the time it takes an officer to check a few manually.

Benefits of the VPH

- Transforms affordable IP cameras into advanced LPR cameras through AI-powered OCR.
- Adds extra "eyes" to boost productivity and accelerate case closures.
- Instantly compares plates to databases, sending actionable alerts to officers in the field.
- Seamlessly integrates with the EOC for in-depth queries, link analysis, and investigative support.
- Flexible and scalable—deploy in high-traffic corridors, crime hotspots, or sensitive facilities.

Camera & Deployment Guidance

Leonardo removes the guesswork from choosing the right camera setup. Selection is based on use case, lighting, and mounting distance. Best results are achieved with mid- to high-quality digital cameras optimized for day and night performance.

The Leonardo Advantage

Partnering with Leonardo means more than technology—you gain decades of LPR expertise, 24/7 customer support, and solutions proven in the toughest conditions.

Request a consultation today to see how the VPH can strengthen your agency's investigative capabilities, help close cases faster, and make your community safer.
